## IMPORTANCE OF YOUTH EDUCATION

### Summary

The article discusses the important role of education in human life. It talks about the values and directions of education in the lives of young people. It notes that the education generally provides the people with knowledge and skills. It plays a major role in shaping the personality of young people. Education is essential for every individual to succeed in life. In short, education is a guide from darkness to the light. It emphasizes that education is vital to the healthy growth and development of one's personality.

**Key words:** *education, youth, society, knowledge, communication, generation*

Education is and always will be very important in building a strong foundation in one's life.

First, Education teaches the ability to read and write. Reading and writing is the first step in Education. Most information is done by writing. Hence, the lack of writing skill means missing a lot of information. Consequently, Education makes people literate.

Above all, Education is extremely important for employment. It certainly is a great opportunity to make a decent living. This is due to the skills of a high paying job that Education provides. Uneducated people are probably at a huge disadvantage when it comes to jobs. It seems like many poor people improve their lives with the help of Education. Better Communication is yet another role in Education. Education improves and refines the speech of a person. Furthermore, individuals also improve other means of communication with Education.

Education makes an individual a better user of technology. Education certainly provides the technical skills necessary for using technology. Hence, without Education, it would probably be difficult to handle modern machines.

People become more mature with the help of Education. Sophistication enters the life of educated people. Above all, Education teaches the value of discipline to individuals. Educated people also realize the value of time much more. To educated people, time is equal to money.

Finally, Educations enables individuals to express their views efficiently. Educated individuals can explain their opinions in a clear manner. Hence, educated people are quite likely to convince people to their point of view.

This is especially true in terms of looking at our future generation. We want our youth to be educated, to be up to date with current issues, and able to provide knowledge to the next generation. Education is a strong building block in building a stronger and healthier community.

This starts by putting an emphasis on the importance of education in our youth today. It is our obligation to help a child develop their identity and to be a contributing factor to society. We must refocus on the idea that a child is the center of our community. As a community, we must provide protection, security, knowledge, and most importantly good values. If we can help our youth to become positive and engaging members of society, this will only help in developing, not only a stronger and healthier community, but a safer one as well.

When considering the shaping of our future generations, we must look seven generations back and seven generations ahead. It is important to respect our past in terms of how we raised and how we can develop previous teachings to ensure that our future is growing as well. It is important to stress these values and to create a path for future generations to follow. A key factor in maintaining these values, again, is education. As a community, we want to see our children grow into strong leaders to develop and nurture our community further. Education and the importance of pursuing post-secondary education are vital to the development of our children and the community.

By engaging families to start the saving process earlier, we are hoping to help children and families build a college-bound identity: that is, to change the question in children's minds from "should I go to college?" to "where should I go to college?" Research conducted on this idea has proven that having a savings bond for a child can increase school performance, attendance, and motivation to pursue post-secondary education. Engaging our children earlier on is the only way to ensure that seven generations from now will continue to flourish into a stronger and healthier community.

### **What is the importance of education to youths?**

Education is important for young people because it provides youth with tools and critical skills to gain employment and provide for themselves and their families in the future. Education also helps bring awareness to economic growth, environmental issues and sustainability. Young people who are educated know how to fight the spread of diseases, improve their health and the health of the community, and better care for themselves and their families.

Young people gain from an education because it encourages stability, awareness of discrimination and disparities in society, the ability to make informed decisions, and transparency. Education can also provide opportunities for financial security for troubled youths while decreasing the risk of young people committing crimes and becoming incarcerated.

Education can also be the catalyst for developing interests, hobbies and future careers. Students engaged in art, music or writing classes could discover hidden talents and build their self-esteem. Education can provide students the ability and confidence to socialize and network with others. Misconceptions and myths that derail or mislead young people are uncovered through knowledge and learning about current events. Young people often learn how to live in harmony and recognize the value of differences among people in their community when educated.

Education serves as the means to bring about the desired change in society, to develop a generation of virtuous individuals and thus contribute to the development of good human beings. The fundamental purpose of education is to gain knowledge, inculcate the forms of proper conduct and acquire technical competency. Education serves as the means to develop oneself physically, mentally and socially. The importance of education to youths manifests itself in terms of the need to cultivate the youths of society into mature individuals. Education is important for the youths, as youth is their growing stage. It is the time to develop the principles of life, make career decisions and begin the pursuit of one's goals. Education to the youths should consist of the training that is an extension to their fields of interest. The education should help the youths define their career objectives, decide what they want from life and enable them to achieve success in their fields of interest. Education to youths must aim at helping an individual form a skill set and work upon it to develop expertise in the areas of his/her interest. The education for youths should consist of courses that can help the youths with their careers and aims of life. Education to the youths should open doors for new opportunities in various fields. It should help the youths find avenues to pursue their likes. It should enable them venture into new fields and explore new areas. Education must help the youths realize their goals. It is important that the education to youths aim at developing a social awareness in these adults-to-be. It is important that the training given to them consist of environmental education. Values like saving animals, curbing deforestation, controlling pollution should be inculcated in the youths of today. The education to youths should bring before them the present-day problems faced by the society. The youths might come up with innovative solutions to the problems of today. Education should aim at resolving to foster the good practices into the youth in such a way as a conscious choice rejecting the bad ones. Education to youths should bring forth the critical social issues and encourage the youngsters to resolve them. Education should motivate the youths to come forward to work for society. It should instill in them a feeling that they belong to the society and that it is their responsibility to drive it on the righteous path. Overpopulation is another important social issue we face today. It is one of the greatest concerns of humanity. Sex education, effects of excessive growth of population and the ways of controlling population need to be taught to the youths of the present times. The education to youths should give them a sense of social awareness, along with their growing sense of self-awareness. The fundamental purpose of education is to create good human beings. Education is vital to the healthy growth and development of one's personality. In making the 'beings' 'human' to produce 'human beings', lies the importance of education to youths.

Education is and always will be very important in building a strong foundation in one's life.

As a community, we must provide protection, security, knowledge, and most importantly good values. If we can help our youth to become positive and engaging members of society, this will only help in developing, not only a stronger and healthier community, but a safer one as well.

Education is important for young people because it provides youth with tools and critical skills to gain employment and provide for themselves and their families in the future. Education also helps bring awareness to economic growth, environmental issues and sustainability. Young people who are educated know how to fight the spread of diseases, improve their health and the health of the community, and better care for themselves and their families. Education is the key to move in the world, seek better jobs and ultimately succeed in life. Education is the best investment for the people because well-educated people have more opportunities to get a job, which gives them satisfaction. Educated individuals enjoy respect among their colleagues and they can effectively contribute to the development of their country and society by inventing new devices and discoveries. Main purpose of education is to educate individuals within society, to prepare and qualify them for work in economy as well as to integrate people into society and teach those values and morals of society. Role of education is means of socializing individuals and to keep society smoothing and remain stable. Education in society prepares youngsters for adulthood so that they may form the next generation of leaders. One of the education essential tasks is to enable people to understand themselves. Students must be equipped with knowledge and skills which are needed to participate effectively as member of society and contribute towards the development of shared values and common identity.

Education serves as the means to bring about the desired change in society, to develop a generation of virtuous individuals and thus contribute to the development of good human beings. The fundamental purpose of education is to gain knowledge, inculcate the forms of proper conduct and acquire technical competency. Education serves as the means to develop oneself physically, mentally and socially.

The first thing that strikes me about education is knowledge gain. Education gives us a knowledge of the world around us and changes it into something better. It develops in us a perspective of looking at life. It helps us build opinions and have points of view on things in life. People debate over the subject of whether education is the only thing that gives knowledge. Some say education is the process of gaining information about the surrounding world while knowledge is something very different. They are right. But then again, information could not be converted into knowledge without education. Education makes us capable of interpreting things, among other things. It is not just about lessons in textbooks. It is about the lessons of life. One thing I wish I can do is, to provide education for all: no child left behind and change the world for good!

Education develops a country's economy and society; therefore, it is the milestone of a nation's development. Education provides knowledge and skills to the population, as well as shaping the personality of the youth of a nation.

Education is very important for an individual's success in life. It can give a big impact on human opportunity in continuing their life quality. Education is generally seen as the foundation of society, which brings economic wealth, social prosperity and political stability. Economic and social status depends on education obtained by individual since education contributes to individual capability in managing quality of life. It can help one's individual to avoid from poverty, build up harmony and democracy society. Education means a change in man's conduct of life. It means the upgrading of a man's ability to choose the best alternative available in any circumstance he faces. It means the development of the person to prepare him to adopt the best approach to a problem at any given time. Education defined as 'adjustment ability to a changing situation and environment'. Education is more than an economic investment: it is an essential input upon which life, development and the survival of man depend. We all know that it is the responsibility of everyone in a country to educate; whether we are parents, adults, children, or teachers, in the public or private sector, education is the responsibility of everyone. However we see the needs and problems, most of us would agree that the role of education is to help provide the opportunity for all people to develop as fully as possible.

Without education, one's self-esteem is not as strong as a person who acquires knowledge in education. Obviously, education has a very important role in transmitting and fostering values that determine, in turn, behaviors, attitudes, reactions specific of responsible citizens.

All members of society including teacher, educational facilities and government's commitment need to get involved in improving education. For instance teachers also must have a strong identity and at the same time strong commitment in cultivating the sense of identity to the students. The government needs to play an important role in the development of national education. It includes provide adequate education, take care of teacher's welfare and avoid making education as a political medium.

As a conclusion, education plays a significant role in achieving a good quality of life. It is because education is importance guidance in human's life. It can be regarded as important medium in changing the paradigm shift in one's individual. Generally, education is always associated with the process of delivering skill, disseminating knowledge and internalizing value. Practically, individual who equipped with knowledge

can be able to internalize and apply the knowledge in every day's life. In children's context, education can be seen as continuing process of their development, so that they can practice and apply their knowledge as preparation in the future. Thus, education is major aspect of development of any modern society since if there is a deficit of educated people then society will stop its further progress. Their development, so that they can practice and apply their knowledge as preparation in the future.

Education is a ray of light in the darkness. It certainly is a hope for a good life. Education is a basic right of every Human on this Planet. To deny this right is evil. Uneducated youth is the worst thing for Humanity. Above all, the governments of all countries must ensure to spread Education.
